

BY, KG, KZ, MD, RU, TJ, TM
PRIORITY APPLN. INFO.:

AB An improved T-cell vaccine and methods of making the vaccine are described. The vaccine may be made by stimulating T-cells with all epitopes of an antigenic polypeptide that may be capable of stimulating autoreactive T cells.
ST autoreactive T cell vaccine epitope
peptide multiple sclerosis myelin
IT Glycoproteins
RL: BSU (Biological study, unclassified); BIOL (Biological study)
(MOG (myelin oligodendrocyte glycoprotein); induction of
autoreactive T-cell vaccine for therapy by use of myelin epitopes that
stimulate autoreactive T cells)
